

Any traditional setting will be enhanced by the elegant details of these two remarkable globes. Their distinctive looks make a statement in any setting. Both globes are illuminated to provide discreet lighting.

CINTHIA

EMILY

Emily is a Swedish design with a clean modern look. The tripod standing is a half-meridian, made of hard wood in walnut colour. Wheels allow easy movement.

Cinthia is mounted on a distinctive carved hardwood base. It boasts classical design details and a revolving solid brass meridian. Wheels allow easy movement.

Nova Rico has produced decorative, educational and antique style geographical globes for over 50 years in its factory in Florence, Italy. Nova Rico makes several globes ideally suited for children. They are designed to stimulate children's interest in the world's geography.

CIRCUS

CIRCUS (shown above) is a 25 cm globe. It is illuminated and it features different animals found around the world.

The illuminated **SYMBOLE** 30 cm is an attractive globe which shows not only the map of the world but also some of the animals and marine life which inhabit specific areas. An illustrated book describing the animals and marine life in more detail is included.

SYMBOLE

The illuminated **RAETH** 30cm globe, with a wooden base and metallic arc, shows not only the map of the world but also some of the animals and marine life which inhabit specific areas. An illustrated book describing the animals and marine life in more detail is included.

RAETH

LINEA STELLARE

30 cm **STELLARE** is a unique illuminated globe which features a map of the sky. Constellations are indicated by astrological and scientific names. Black wood base and matt steel accessories.
